Borders question sentiment analysis

Some people advocate for open borders. What are the implications of such a policy?

Allocation question sentiment analysis

Allocating scarce resources is a challenge. Should there be a minimum package of health services for migrants in any country? If so, what should that minimum be and who should pay for it?
What are the risks and benefits to assimilating and integrating migrants?

How do we leverage the talents and resilience of migrants to address migrant issues?

How do societies move toward intercultural harmony while maintaining cultural diversity?
Benefits of migrants in current world sentiment analysis

In an increasingly anti-migrant, nationalistic, world how do you communicate the benefits of migration and advocate for them?

Populism sentiment analysis

Given the rise in populism, what are some options to navigate sovereignty, security and human rights in provision of health care to migrants?
